"Zenitel - The world-leading provider of **Intelligent Critical Communication solutions**"

## Why Zenitel?

Zenitel is well positioned to drive the future of intelligent critical-communication solutions. Through our portfolio of IP products & solutions, with built-in intelligence and a focus on cybersecurity, we provide organizations with superior, scalable security and flexibility. Zenitel is the proven, preferred choice for environments requiring crystal-clear audio to ensure the protection of human life, property, assets and the management of critical activities. With interoperability at all levels, we seamlessly integrate with access control, video management and security platforms.

# IC-EDGE

The next-generation intelligent communication system that delivers seamless integration and unrivaled sound quality, security and ease of use, right out of the box.

Minimize your hardware needs, maximize your audio quality and performance and consolidate your setup into a centralized system requiring no external server.

**zenitel**

because communication is critical

## The Future of Intelligent Communication

Enabled by a new technologies like cloud intelligence, big data & machine learning, and human interfaces with voice control, the next generation of Intelligent Communication systems will blend in the new reality of Internet of Things and smart devices.

The possibilities are endless - Integrated Intelligent Communication Systems will be more powerful, smarter than ever before and easier to operate and deploy. They will be enabled by a paradigm shift in architecture – we call it Intelligent Communication at the edge.

### PERVASIVE

Wherever we live, work or travel, we will be surrounded by more intelligent communication devices that help us to stay safe, secure and connected to the people and networks that matter.

### SMART

Cloud Intelligence, big data and machine learning will bring unseen levels of intelligence and interoperability, enabling safe and secure buildings and locations.

### EASY

The growing importance of voice and audio as the preferred human interface to devices and networks will allow for reliable and easy voice control and authentication.

## Intelligent Communication at the Edge

With Intelligent Communication at the edge, Zenitel introduces a paradigm shift in the way intelligent communication systems are used, deployed and integrated in safety and security systems, as well as cloud networks.

With this technological advance, we are taking the knowledge gained from cloud computing and combining it with Intelligent Communication at the edge, thereby delivering superior power, flexibility, and expandability.

### Audio Quality

Your ability to hear, be heard and be understood in any situation is essential. Zenitel's Intelligent Communication systems are used in the world's most demanding and challenging environments, due to their unrivaled sound and audio quality.

### SEAMLESS INTEGRATION

The next generation of intelligent communication systems offer seamless integration with the leading risk, resilience and security solutions by adopting open standards and out-of-the box connectivity and activation.

### SCALABILITY

Your communication needs can change and grow over time. Our IC-EDGE system is highly scalable, so it can expand to meet your needs, gradually, allowing you to spread your investment over time.

### CYBERSECURITY

Our solutions comply with stringent IT requirements for mission-critical systems – they are not only highly available, reliable, scalable and maintainable, but also provide adequate defense from outside threats and attacks.

## IC-EDGE Series

The next-generation Intelligent Communication System that delivers seamless integration and unrivaled, sound quality, security and ease of use, right out of the box.

### FEATURES

#### Intelligent at the core

Intelligibility - Discoverability – Adaptive  
– Smart Audio Management

#### Easy to deploy and operate

Plug&Play – Edge-managed-SIP Mode  
– Self-aware - Secure

#### Interoperable

Industry Standards – Out-of-the-box Integrations  
– Multiple Platform Connectivity

“The next generation of **Intelligent Communication** systems delivers unseen levels of operational efficiency, security and ease of use”
